

Introduction to wikis and other collaborative tools

Martin De Saulles

November 2009

What is a wiki?

“Wiki is a piece of **server software** that **allows users** to **freely create and edit** Web page content using any Web **browser**”

Source: www.wiki.org

Advantages

- Easy to use - WYSIWYG
- Cheap/free
- Ideal for collaboration – versioning issues
- No special software needed – accessible
- Usually managed hosting
- Robust

Review

From Wikipedia, the free encyclopedia

For other uses, see [Review \(disambiguation\)](#).

See also *[critic](#)*.

A **review** is an evaluation of a publication, such as a [movie](#), [video game](#), [musical composition](#), [book](#), or a piece of hardware like a [car](#), [home appliance](#), or [computer](#). In addition to a critical statement, the review's author may assign the work a [rating](#) to indicate its relative merit. More loosely, an author may review current events or items in the news.

A compilation of reviews may itself be called a review. *The New York Review of Books*, for instance, is a collection of essays on literature, culture, and current affairs. *National Review* founded by [William F. Buckley, Jr.](#), is an influential [conservative](#) magazine, and *Monthly Review* is a long-running [socialist](#) periodical.

In [scientific literature](#) the [literature review](#) is a category of [scientific paper](#), which provides a synthesis of research on a topic at that moment in time. A compilation of these reviews for the core content of a 'tertiary' [scientific journal](#), with examples including Annual Reviews, the Nature Reviews series of journals and Trends.

A [peer review](#) is the process by which scientists assess the work of their colleagues that has been submitted for publication in the scientific literature. A [software review](#) is also a form peer review, by the co-workers.

Talk:Review

From Wikipedia, the free encyclopedia

External links

A few days ago I removed a piece of link spam added to this article. Now looking at the section, I don't believe any external links meet the [WP:EL](#) requirements. In particular **be avoided**:

- Links mainly intended to promote a website*
- Sites that are only indirectly related to the article's subject: the link should be directly related to the subject of the article.*

Since this article is about such a general subject, it just attracts people wanting to add their own 'review' sites. Having a comment warning people to keep the list to 2 or 3 it's going to work. Which two or three?

Not being about a specific thing, I don't think any external links belong in this article. So I'm just going to remove the 'External links' section. --[lmroy](#) 10:50, 7 April 2007 (UTC)

Order of terms

Video game? as the second most common thing that gets 'reviewed'? Seriously? [MickMacNee \(talk\)](#) 01:29, 10 May 2008 (UTC)

Customer Testimonials

As for the service overall, I like the fact that it is pretty simple to use and I haven't had too many difficulties in setting up my wiki. This must be Zoho Wikis biggest advantage: ease of use. I have been really impressed and I have recommended it to fellow professionals in my line of work.

Ian Clark

Boost productivity with Google-powered documents, video sharing and collaborative sites

- **Essential collaboration apps** – [Google Docs](#), [Google Video](#) and [Google Sites](#) are included.
- **Continuous innovation** – Put the web's rapid pace of innovation to work for your business. [New Features](#)
- **Smoother information sharing** – Improve traditional software with more efficient collaboration. [Learn how](#)
- **Worker mobility** – Access your data from anywhere. Employees can be productive from any computer.
- **Information access control** – Each piece of content can be as private or as public as necessary.
- **Enterprise-class service** – Google Apps includes a 99.9% uptime SLA.* Phone support is available for critical issues.
- **Secure infrastructure** – Multiple layers of protection keep your business data safe and secure. [Learn more](#)

Why businesses use Google Sites to share knowledge

1. **Keep company information secure** – Set consistent sharing permissions across all company sites.
2. **Make useful information accessible** – Create an intranet or let project teams build sites to capture and share departmental knowledge.
3. **Share files simply** – File versioning is done automatically, so it's easy for people to make updates and get the latest version. Supported formats include .doc, .xls, .csv, .ppt, .txt, .pdf and more.
4. **Unify content from many sources** – Display Google Documents, Spreadsheets, Presentations, YouTube videos, Picasa slideshows and gadgets without any programming skills.
5. **Find information instantly** – Google search technology is built-in, so employees can find useful company information as easily as searching the Internet.
6. **Let employees contribute** – No coding or system expertise is required to update pages or create new internal sites, so anyone can add to shared knowledge.

"In Washington, DC, we have improved the city's procurement process using Google Sites to make RFPs available to vendors and the public. It's fast and easy for city workers to add videos, documents, presentations and more. The new procurement web sites make our acquisition process more competitive and bring more transparency to our government."

– Vivek Kundra, Chief Technology Officer, District of Columbia Government
